**RV PARTS CATALOG**

**2025**

While what we “do” is design and manufacture premium parts and service solutions for RVs, it’s “how” we do it that really matters.

We see our work as solving problems. We’re real people, driving real solutions, for real needs. Everything we do is in service to our customers. Why? Because they deserve a far better experience.

The products we make, and how we deliver them, is worth talking about. If we can help make a better-than-expected journey on (and off) the road, we’ve done our job. We do what we do because we believe that:

# FENDER SKIRTS

### UV Protected

Keep your RV looking fine with replacement fenders that will not fade! ICON Fenders contain a UV protective layer in the material for extended color and the prevention of yellowing.

### Heavy Duty

These fender skirts are formed of durable and textured ABS plastic for a long service life. Keep minor bumps and impacts from ruining your vacation and requiring replacement.

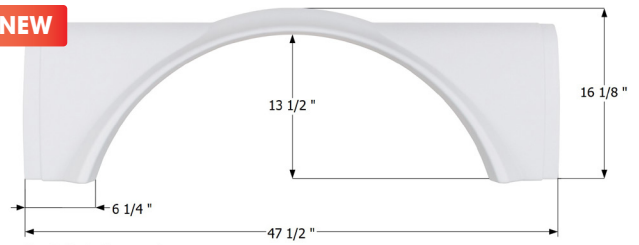

### Huge Selection

We have your replacement! Discover fender skirts based on brand tags and measurements. With over 1000 unique parts of fenders in a variety of different colors, a match is not far away.

# YOUR JOURNEY IS THE EXPERIENCE

At ICON, our commitment is to improve your RV experience, ensuring that every mile is smoother and more enjoyable than the last. We believe your journey is the experience, and we're here to make it exceptional.

## About ICON

Founded in 1997 by John Loewen, ICON Technologies Limited has grown from a small 1,600 square foot facility to a nearly 300,000 square foot state-of-the-art manufacturing plant in Winkler, Manitoba. Specializing in rotational molding and thermoformed plastic products, ICON serves the RV industry with a commitment to premium quality and customer satisfaction.

## Our Journey

At ICON, we believe that the journey our customers take with us is the essence of their experience. From designing innovative parts to delivering exceptional service, our focus is on solving real problems for real people. Our premium products and customer-first approach ensure that every interaction reflects our dedication to excellence.

## Meeting Needs, Exceeding Expectations

In 2008, ICON saw an opportunity to fill a void in the market caused by the closure of Fleetwood RV. We began developing replacement parts for ‘orphaned RVs,’ ensuring owners could maintain their vehicles with quality parts that exceeded original specifications. Today, ICON offers over 1000 fender skirts and a wide range of other products, including skylights, air-conditioning shrouds, and fresh water tanks.

## Our Commitment to Quality

Quality is at the heart of everything we do. Our parts are superior to the originals, such as our thicker, more durable skylights. We maintain a vast inventory to ensure fast shipping, and our user-friendly websites make it easy for customers to find exactly what they need without hassle.

## Innovation and Service

ICON’s success is driven by our commitment to innovation and exceptional service. Our advanced production facility, equipped with CNC-operated machines and large-format printers, allows us to

create customized packaging and maintain high standards of quality control. We continuously seek ways to improve our processes and products, staying ahead of industry trends and customer needs.

## Our Community

Our flat organizational structure and positive work environment foster a culture of community and excellence. We believe that happy, well-treated employees are the key to delivering outstanding service to our customers. At ICON, we are more than a company—we are a family dedicated to making every journey a remarkable experience.

## Looking Ahead

As we continue to grow and expand, our focus remains on delivering the best possible products and experiences to our customers. Whether it’s through direct sales, international distributors, or our innovative online platforms, ICON is committed to being a trusted partner in your journey.

# ICON RV STOPOVER

At ICON, your RV travels are about the moments along the way. That's why we offer four complimentary stopover sites at our manufacturing plant in Winkler, MB, conveniently located near frequently traveled routes.

## Experience the Convenience

Our stopovers are free for any RV traveler. Explore the nearby Winkler Discovery Nature Preserve or enjoy downtown shopping and attractions.

## Connect with Us

Come in and chat with our friendly staff. We'd love to hear about your RV travels and share stories.

Stay with us and let us be a part of your journey. Your journey is the experience, and we're here to make it extraordinary.

# RV PARTS FAST

## Amber Balcaen: Racing Ambassador for ICON

Meet Amber Balcaen, a dynamic force on the racing circuit and a proud ambassador for ICON. As a sponsored athlete, Amber embodies our commitment to excellence and speed, reflecting ICON's "RV Parts Fast" principle in every race. Her journey from dirt tracks to professional racing showcases determination, skill, and a passion for pushing boundaries. See how ICON's support and innovation drive success both on and off the track.

## ICON's Fast Shipping Commitment for RV Parts

At ICON, we believe in delivering more than just quality RV parts — we deliver speed. With our streamlined processes and efficient logistics, we ensure fast shipping so that our customers receive their products promptly. We value your time and understand the urgency of your needs, which is why we prioritize swift delivery without compromising on quality or service. Join us in embracing speed and reliability with every purchase from ICON.

# WIND DEFLECTORS

## Adjustable & Easy Installation

Maximize versatility with the AeroShield, which adjusts to any angle for optimal aerodynamic efficiency and folds down to a compact 6 1/2" height when not in use. The AeroShield ships fully assembled, requires no drilling or modifications, and fits most vehicles (see application guide), ensuring a hassle-free setup and convenience.

## Aerodynamic Efficiency

Enhance your tow vehicle's performance with the AeroShield's aerodynamic design. By reducing wind resistance and eliminating turbulence between your vehicle and RV, the AeroShield ensures smoother handling and up to 3 MPG better fuel mileage. Enjoy improved stability, a cleaner trailer free from bugs, and a more efficient journey.

# SKYLIGHTS

## UV Protected

Our skylights are constructed using premium polycarbonate material, specifically designed to resist the harmful effects of UV rays. This UV protection ensures that our skylights remain robust and resilient, preventing brittleness and leaks over time.

## Heavy Duty

ICON RV skylight domes are the epitome of durability. Crafted with exceptionally thick polycarbonate, they surpass the standards of typical originally equipped skylight domes. Their superior impact resistance stops breakage, preventing the nightmare of costly water damage that RV owners dread.

## Quick Installation

Installation made quick and easy! With ICON Skylight sealant and screws, you can effortlessly install ICON Skylight domes on any type of RV roof. Enjoy hassle-free, secure, and efficient setup, giving you more time to hit the road and less time on DIY projects.

# WIND DEFLECTOR INSTRUCTIONS

WD500 SERIES & WD600 SERIES

# AeroShield™

by **ICON**

## IMPORTANT! READ BEFORE INSTALLING

1. Our wind deflectors are designed to mount onto the majority of vehicles on the market today. The gutter hooks provided fit most external or internal rain gutters. There are also some vehicles where this design is not applicable. It is the customer's responsibility to choose and install the correct hook for their respective vehicle and to check for proper fit.

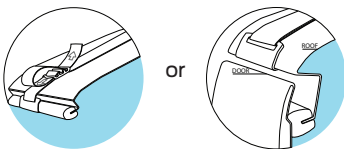

2. Road safety considerations require that all bolts and straps should be inspected regularly for tightness when installing the wind deflector for a long period of time. Travelling at high speeds, high winds, or driving on gravel causes vibrations, which could loosen bolts and straps. We recommend inspecting your AeroShield every 500 km when driving on pavement and every 200 km when driving on gravel.

3. The utility strap can be cut to an exact length where required. The cut edge should then be sealed by heating lightly with an open flame until the material starts to melt.

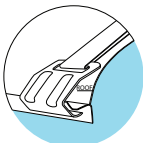

## Preparation for Installation

1. Choose the appropriate suction cup mounting position for your vehicle, taking into account any ribs on your roof.
2. Move suction cups to desired position by removing bolts and re-attaching.
3. Ensure that all bolts on entire wind deflector are fully secure before mounting on vehicle.

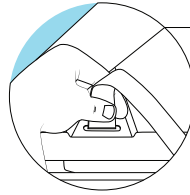

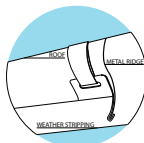

### Internal Rain Gutter

### External Rain Gutter

### #9 Hook, Concealed under weather stripping

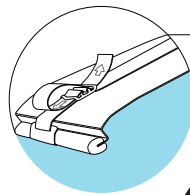

1 Feed the nylon strap through the slot on the side of the wind deflector.

2 Choose appropriate hook for your vehicle according to the Wind Deflector Hook Application Guide.

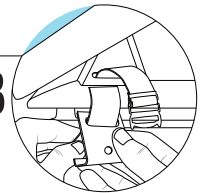

For the latest hook application guide, **scan** or go to [icondirect.com/hooks](http://icondirect.com/hooks)

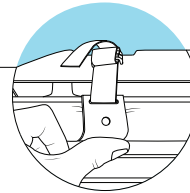

4 Feed the end of the strap through the middle of the buckle from the bottom, then through the front of the buckle from the top. After that feed the end of the strap through the back of the buckle from the top. (The strap should now make a loop.)

3 Slide the correct hook onto the nylon strap.

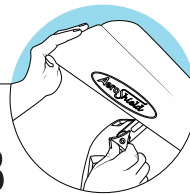

5 Repeat the above steps for each of the four straps.

6 With vehicle doors open, position the hooks so that they firmly engage the external or internal rain gutters. (Some vehicles do not have rain gutters. The hooks should attach to the cab between the door and the roof.) All four hooks must be used. **DO NOT** attach hooks to the door or window.

7 Adjust tension on the four straps evenly so that the wind deflector is centered on the roof and hooks are securely attached to the vehicle. **BE SURE TO FULLY TIGHTEN THE STRAPS.** There should be no slack on the straps if tightened properly.

8 Adjust the angle of the wind deflector so that it is aimed at the top of the trailer you are towing.

9 Tighten the 3-prong wing nut and bolt after adjusting the angle.

Your wind deflector is now ready for use!

# SPIN FITTING INSTRUCTIONS

## Fresh water tanks

- 1 When attaching a Spin Weld Fitting, select an area as flat as possible, where the fitting and Driving Tool can turn freely.
- 2 With the proper size Hole Saw, drill a hole in the container slightly larger than the pilot on the fitting. The fitting must be able to rotate freely.
- 3 On small fittings (1/2" and smaller) you can use a 1 HP Electric Router. On fittings measuring 3/4" to 1-1/2", a 1 to 1-1/2 HP to 2 HP Electric Router is acceptable. On small fittings 1/2" and smaller, we supply drivers with 1/4" shanks. Our fittings 3/4" and larger, we supply drivers with 1/2" shanks. All electric routers should have 18,000 to 25,000 RPM's.
- 4 Place fitting pilot in the hole of the container.
- 5 Holding the Router in your hands and having the driving tool attached to the fitting, turn on the power and apply slight pressure so that molten plastic starts to flow around the outside diameter of the fitting. You will develop a technique as to how to apply pressure. The melting process will only take 2-3 seconds. Turn off the power and keep the driver in position with applied slight pressure for another 5 seconds. This will ensure a good bond with approximately 1/4" molten plastic surrounding the diameter of the fitting.
- 6 After 1 minute you can apply testing procedures, such as tapping with a hammer or prying with leverage.
- 7 Plug open fittings to keep the tank clean or install plumbing as necessary.
